

Press Release

Malaysia PM invites GHVERSE to drive growth and innovation in India Malaysia Green Energy partnership.

- GHVERSE had attended the round table meeting with The Hon Prime Minister of Malaysia & Indian captains of Industries organized by Malaysian Investment Development Authority.
- GHVERSE is actively exploring East Malaysia to establish large-scale production facilities for Green Hydrogen and Ammonia
- This ambitious project is poised to significantly advance Malaysia's strategic vision of becoming a leading force in the green economy within the region.

New Delhi, August 21, 2024 – GHVERSE is proud to announce its participation in a high level roundtable meeting with other Captains of Industry organised by Malaysian Investment Development Authority (MIDA Mumbai) chaired by The Honourable Prime Minister of Malaysia, Dato' Seri Anwar bin Ibrahim, during his state official visit to New Delhi, India. The meeting focused on exploring collaborative opportunities in many sectors including green energy, particularly in the development of green hydrogen and ammonia solutions that support Malaysia's commitment to sustainable energy transitions.

During the discussion, Mr. Pranab Kumar Sarmah, Founder of GHVERSE, presented the company's ambitious vision to expand green hydrogen and ammonia manufacturing across Asia. The conversation emphasized the crucial role these clean energy carriers will play in advancing global efforts towards carbon neutrality, especially in decarbonizing heavy industries such as energy, steel, cement, and transportation.

Malaysia welcome GHVERSE's green hydrogen aspirations, highlighting how they align with Malaysia's strategic goals to become a regional leader in the green economy. The Prime Minister underscored the immense potential for cross-border collaboration to drive investments and scale up green hydrogen and ammonia production, thereby accelerating renewable energy initiatives across Southeast Asia.

"We are honored to have had the opportunity to meet with the Malaysian Prime Minister and discuss our shared vision of building a greener, more sustainable future together," said Mr. Pranab Kumar Sarmah, Founder of GHVERSE. "This meeting reinforces our

commitment to advancing innovative green energy solutions, not just in India but across Southeast Asia, where the demand for clean energy is growing exponentially.”

This meeting marks a significant step toward international cooperation in renewable energy. GHVERSE agreed to further explore potential collaboration, including joint ventures, research and development partnerships, and investments in green hydrogen and ammonia infrastructure.

About GHVERSE India Private Ltd

GHVERSE India Private Limited is a wholly owned subsidiary of GHVERSE PTE Ltd., dedicated to advancing the global transition to cleaner energy sources. Recognizing the critical need to move away from fossil fuels, GHVERSE focuses on producing and supplying green hydrogen and ammonia as sustainable alternatives. These energy carriers are poised to revolutionize key industries, including transportation, manufacturing, and power generation.

GHVERSE's aims to develop, build, own, and operate large-scale green hydrogen and ammonia production plants, with a focus on both domestic and international markets. With a strong track record, GHVERSE's promoters have successfully delivered large-scale renewable energy and energy storage projects across Asia.
